9. Conclusion

- SEC-001-STRICT: ✓ No false positives. Rule correctly identifies only active security incidents.
- TECH-001-STRICT: ✓ No false positives after removing generic keywords (adopt, new policy).
- Coverage: ✓ Only 11.8% uncategorized (target: <15%).
- OPS-050: ■ 15 proposals with important keywords marked as operational, but other rules correctly override the cap.

Recommendation: Rulebook v2.7.0 is validated and ready for Phase 4 code freeze.
